System: Einzugsdämpfung, bis zu 60 oder 100kg, für leisen und sanften Schiebekomfort, bei obenlaufenden Holztüren für ECU-PORTA 60/100 Holz Systeme.
Design: Einzugsdämpfung in Laufschiene integriert.

System: Soft and self closing system, up to 60 or 100kg, for quiet and gentle sliding comfort with top-running wooden doors for ECU-PORTA 60/100 Wood systems.

Design: Soft and self closing system integrated in the running track.

Système : Amortissement pour retour automatique par traction jusqu'à 60 ou 100kg, pour un confort de coulissement doux et silencieux, pour portes en bois à roulement en haut pour systèmes ECU-PORTA 60/100 Bois.

Design : Amortissement pour retour automatique par traction intégré au rail de roulement.

Einbaubeispiele / Mounting examples / Exemples de montage

Laufschiene mit Montageöffnung und Abdeckkappe / Running track with assembly opening and cover cap/ Rail de roulement avec ouverture de montage et cache

Laufschiene, deckenbündige Montage mit Montageöffnung und Abdeckkappe – erlaubt nachträgliche Montage der Einzugsdämpfung durch Montageöffnung.

Running track, for installing flush with ceiling, assembly opening and cover cap – allows the soft and self closing system to be retrofitted through the assembly opening.

Rail de roulement, montage affleurant avec le plafond, ouverture de montage et cache – permet un montage ultérieur de l'amortissement pour retour automatique par traction.

Laufschiene ohne Montageöffnung und Abdeckkappe / Running track without assembly opening and cover cap/ Rail de roulement sans ouverture de montage et cache

Laufschiene, Wandmontage ohne Montageöffnung – Montage der Einzugsdämpfung sollte seitlich erfolgen.

Running track, for wall mounting without assembly opening – soft and self closing system should be installed at the side.

Rail de roulement, montage mural sans ouverture de montage – le montage de l'amortissement pour retour automatique par traction doit s'effectuer sur le côté.

x = siehe entsprechende Einbaubeispiele im Katalog

see relevant mounting examples in catalogue
 voir les exemples de montage correspondants dans le catalogue

Montageöffnung / Assembly opening / Apertura di montaggio

Die Montageöffnung stellt sicher, dass die Lauftechnik und Einzugsdämpfung nachträglich eingebaut werden können, ohne dass die Laufschiene demontiert werden muss. Die Schiebetüre ist schnell montiert oder demontiert. Zudem erleichtert die Montageöffnung die Reinigung der Laufschiene, für einen ruhigen Lauf der Rollen.

Für folgende Einbausituationen wird eine Montageöffnung empfohlen:

- bei deckenbündigem Einbau der Laufschiene
- wenn seitlicher Zugang für das Einfahren der Einzugsdämpfung nicht gewährleistet ist (min. 62 mm)

The assembly opening ensures that the running system and the soft and self closing system can be retrofitted without the running track having to be removed. The sliding door can be installed or removed quickly. Moreover, the assembly opening makes it easier to clean the running track for smooth running of the rollers.

The assembly opening is recommended for the following installation situations:

- with running track installed flush with the ceiling
- if side access for retracting the soft and self closing system is not available (min. 62 mm)

L'ouverture de montage garantit la possibilité d'un montage ultérieur de la technique de roulement et de l'amortissement pour retour automatique par traction sans qu'il soit nécessaire de démonter le rail de roulement. La porte coulissante peut ainsi être rapidement montée et démontée. Par ailleurs, l'ouverture de montage facilite le nettoyage du rail de roulement pour une course silencieuse des galets.

L'ouverture de montage est recommandée pour les situations de montage suivantes:

- montage du rail de roulement affleurant au plafond
- lorsqu'un accès latéral pour la mise en place de l'amortissement pour retour automatique par traction n'est pas assuré (min. 62 mm)

QUALITY CERTIFICATE

EKU AG hereby certifies that the sliding door fittings of the product line **EKU-PORTA 100 Wood** comply with the requirements of DIN - EN 1527.

Test Information

Classification:	DIN - EN 1527	- 6 2 0 - 0 - 1 3
Door weight:	100 kg	
Endurance test:	100'000 cycles	
Stop reliability:	Complied with the requirements of DIN 68859	
Retention reliability:	Complied with the requirements of DIN 68859	

Additional Information

Ease of installation:	Requirements complied
Tested by:	Laboratory, School of Architecture, Civil and Wood Engineering, Biel Test certificate No.: 7429-PZ-03
Quality assurance:	External and internal monitoring in accordance with ISO 9001:2000
